- Gujarati (Upper Intermediate)

Work Experience

Flutter Developer

Virva Infotech

Jan 2022 to Present

- Designed, developed, and deployed high-quality cross-platform mobile applications using Flutter and Dart.
- Integrated RESTful APIs and third-party services to enhance app functionality and performance.
- Implemented advanced state management solutions like GetX, Provider, Bloc, and Riverpod for complex app architectures.
- Worked with Firebase services (Firestore, Authentication, Cloud Functions) for real-time data synchronization and backend support.
- Utilized local databases such as SQLite and Hive for offline data storage and synchronization.
- Conducted code reviews and mentored junior developers to ensure adherence to best practices and maintain code quality.
- Managed tasks and tracked progress using tools like Jira and Trello to ensure timely delivery of projects.
- Used version control systems like Git, and Bitbucket for efficient code management and collaboration across teams.

Flutter Developer

TechnoComet Solution

Jan 2021 to Jan 2022

- Designed, developed, and maintained cross-platform mobile applications using Flutter and Dart.
- Collaborated with UI/UX designers to implement responsive and visually appealing interfaces.
- Integrated RESTful APIs and third-party libraries to enhance app functionality.
- Utilized state management solutions like GetX and Provider for efficient app state handling.
- Collaborated with backend teams for smooth API integration.

Projects

RentRX – Rental Management App :

Role : Senior Developer

Description : RentRX simplifies rental management with an intuitive platform for payments and tenancy responsibilities.

- Rent Tracking: Manage payments with reminders.
- Auto Rent Payment: Secure transactions via Checkbook.io.
- Credit Check: Seamless reports via Array.com.
- Rewards System: Earn incentives for timely payments.
- Secure & User-Friendly: Strong security with easy navigation.

TADDA – Food Delivery Platform :

Role: Senior Developer

Description : TADDA streamlines food ordering and delivery in Africa, connecting customers, riders, and restaurants.

- TADDA User: Browse, order, and track deliveries in real-time.
- TADDA Partner: Manage deliveries and track earnings.
- TADDA Restaurant: Handle orders, menus, and customer connections.

Shoot Your Shot® – Dating App :

Role: Senior Developer

Description : A modern dating app offering a fresh and engaging experience for the younger generation.

- Unique Matching: A refreshing alternative to traditional apps.
- Smooth Interface: Sleek design for easy navigation.
- Real-Time Interaction: Instantly connect with matches.
- Secure & Engaging: Strong data protection with an interactive approach.

Bunifu Parent App – School Bus Tracking :

Role: Senior Developer

Description : This app ensures parents stay informed about their child's school bus schedule with real-time tracking and updates.

- Live Tracking: Get real-time updates on bus pickup and drop-off times.
- Notification Control: Choose which alerts and updates to receive.
- Child Availability: Mark your child's availability so drivers know when to pick them up.
- User-Friendly: Simple interface for seamless communication.

Adept Mobile – Document Management :

Role: Junior Developer

Description : Adept Mobile extends Synergis Adept's document management to Android, allowing users to access, manage, and collaborate on documents anywhere.

- Document Search: Quickly find files from the Adept server.
- Offline Access: View and edit documents without the internet.
- Markup & Sync: Annotate files and auto-sync changes.
- User-Friendly: Designed for seamless field use.

Holy11 – Fantasy Sports Betting :

Role: Junior Developer

Description : Holy11 lets users bet on sports by creating teams, competing with others, and earning profits based on performance.

- Team Creation: Build your team for any match.
- Competitive Play: Face off against other users.
- Earn Profits: Win by scoring higher than competitors.
- Engaging Experience: Designed for sports enthusiasts.
